Origami for Kids · #02 Fox Face (draw your own) · FOLD SHEET · side A

Print BOTH sides (flip on long edge) at 100% / actual size

1. A grown-up helps cut out the square on the dotted line.
2. Start with side A up. Same folds — then draw the face on the guides.
3. Follow the numbers: fold on the line with the same number as the step.
4. Orange dot = the corner you pick up. Dotted ring = where it lands.
5. After you turn the paper over, the lines are printed on that side too.

Line key

- Valley: fold toward you (line goes inside)
- Mountain: fold away (line stays outside)
- Cut: grown-up helps with scissors

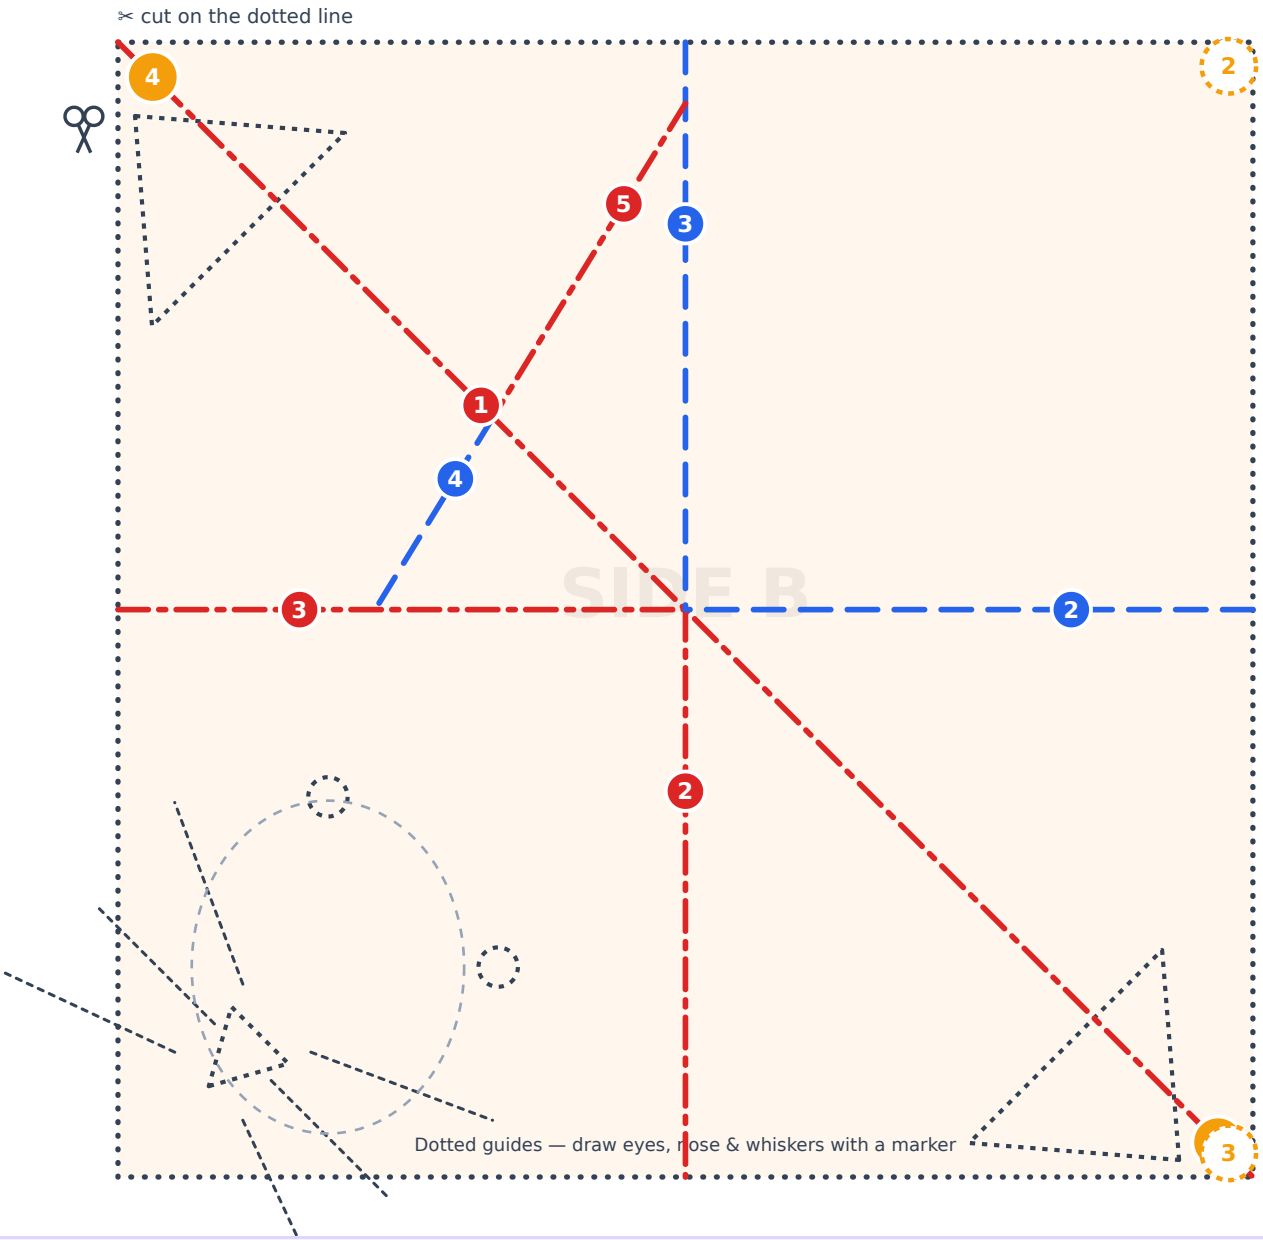

- 1 pick up this corner
- 1 it lands here
- 2 step number on a fold line

Measure: this bar must be exactly 100 mm (print at 100%).

Origami for Kids · #02 Fox Face (draw your own) · FOLD SHEET · side B

Print BOTH sides (flip on long edge) at 100% / actual size

Side B is the back of the square (the coloured side).

A line that is a valley on one side is a mountain on the other — that is normal!

No double-sided printer? Use only side A; the numbers still show every fold.

Draw-your-own: trace the dotted eyes, nose and whiskers with a dark marker after folding — or before if you like.

Plain paper? Skip the print — just draw a fox face on the snout when you finish (step “decorate”).

100 mm

Measure: this bar must be exactly 100 mm (print at 100%).
